ShipBuilding Solutions

MARINE AND OFFSHORE SERVICES

Crafting Excellence Across Every Vessel

Our expertise spans the full spectrum of marine design, construction, and support with a distinct focus on shipbuilding and yacht manufacturing and providing a full range of marine & offshore support services to oil & gas industry, ship owners and operators

The Story

From Naval Command to Global Marine Leadership

Prior to establishing Alex Whaler, Capt. Mohamed El-Deeb spent his early career with Egyptian Navy with several leading roles ended by Destroyer commander then retirement as a Commodore.

After his retirement from the Egyptian Navy, Capt. Mohamed El-Deeb hired as DPA, Port Captain & Company Security Officer for several offshore companies then joined "Arab Academy for science & Technology" team to establish the Regional Maritime Security Institute (RMSI) then started his private business by establishing "North Africa for Trading Co - NATCO" at 2009 shipbroker, marine services and trading company well reputed held several consultancy and services to marine & offshore companies. In 2019 decided to rename & develop NATCO to become Alex Whaler with partnership of his eldest son Mr. Ahmed El-Deeb who is well known as marine & offshore consultant also held MBA & demonstrated history of working in several offshore & marine leading roles.

Combination of their great experience, relations, reputation & partners worldwide in marine, offshore, oil & gas and defense industry will lead Alex Whaler to professionally meet the needs of energy, shipping industry & security by offering a wide range of services in continental offshore and onshore.

About Our Company

At **Alex Whaler**, we master the art and science of the sea; crafting vessels that embody precision, performance, and prestige. From bespoke luxury yachts to commercial and offshore marine vessels, our shipyard stands as a beacon of modern craftsmanship and engineering innovation.

We specialize in the design and construction of yachts, tugboats, anchor-handling vessels, supply vessels, barges, and workboats, combining artistry and technology to create ships that excel in both form and function. Each project is driven by a philosophy of excellence, safety, and sustainability, ensuring that every vessel reflects the trust and ambition of its owner.

Beyond shipbuilding, our expertise extends across the marine and offshore ecosystem, providing integrated services that keep fleets and operations performing at their best including ship management, offshore logistics and support, crew training and certification, vessel maintenance and refitting, marine consultancy, brokerage and trading, chandlery and supply services, bunkering and fueling operations.

With a state-of-the-art shipyard, an advanced naval architecture and design office, and a team of highly skilled engineers, architects, and craftsmen, we bring together innovation, precision, and dedication under one name.

Whether building an exclusive motor driven yacht or delivering an offshore support fleet, we are committed to quality without compromise, engineering without limits, and partnership without boundaries.

Vision

To be a global leader in yacht manufacturing and marine engineering, recognized for crafting vessels that unite artistry, performance, and sustainability — setting new standards of excellence across the luxury, commercial, and offshore marine sectors.

Mission

To design, build, and deliver world-class vessels that embody precision, innovation, and craftsmanship — while providing integrated marine and offshore services that empower our clients to operate safely, efficiently, and sustainably. We aim to transform every client's vision into a vessel of enduring value — whether it sails for pleasure, performance, or purpose.

Our Strategy

Our growth and success are built on a three-pillar strategy that ensures excellence across every operation:

Integration and Innovation

We maintain full control over the design and production process — combining creative design, advanced engineering, and state-of-the-art manufacturing under one roof.

Diversification with Focus

While luxury yacht manufacturing remains our signature, we continually expand into offshore support vessels, tugboats, and utility ships, serving both private and industrial markets.

Sustainable and Smart Operations

We invest in green technologies, digital shipbuilding systems, and hybrid propulsion to lead the next era of sustainable maritime innovation.

Customer-Centric Partnership

Every project is a collaboration — we engage closely with clients to deliver personalized, transparent, and value-driven results from concept to commissioning.

Our Team

Behind every vessel is a team of passionate professionals — the true power of **Alex Whaler**. Our workforce unites naval architects, marine engineers, designers, fabricators, and maritime experts with decades of experience across luxury and industrial shipbuilding sectors. **Our Team Includes:**

Naval Architects & Marine Engineers:

Crafting hulls, propulsion systems, and structural integrity.

Interior & Exterior Designers:

Creating spaces of comfort, elegance, and function.

Production & Quality Supervisors:

Ensuring precision and adherence to class standards.

Welders, Fitters & Technicians:

Skilled hands shaping every frame and detail.

Project Managers:

Overseeing timelines, budgets, and client communication.

After-Sales & Service Teams:

Providing global maintenance, refit, and operational support.

Our Core Values

Excellence:

We pursue perfection in every detail — from design sketches to final sea trials.

Integrity:

We act with honesty, transparency, and responsibility in all partnerships.

Innovation:

We embrace technology and creativity to craft smarter, more sustainable vessels.

Craftsmanship:

Every vessel reflects human passion, skill, and pride in creation.

Customer Commitment:

Our clients' satisfaction defines our success.

Why Choose Alex Whaler

Passion for Perfection

We don't just build yachts and vessels — we sculpt experiences. Every line, curve, and material is selected with purpose, ensuring harmony between design and performance.

Our team's passion is visible in every seam, weld, and finish — because excellence is not a goal, it's our foundation.

Bespoke Design Philosophy

Every owner has a unique story and every yacht we build reflects it.

From the first sketch to the final polish, we involve you in every step of the process, ensuring that your yacht is a true reflection of your personality, lifestyle, and taste.

Advanced Engineering and Technology

Behind our elegant designs lies a world of precision engineering.

We employ state-of-the-art software and digital twin simulations to perfect every structure, ensuring optimal balance, speed, and stability.

Complete In-House Expertise

Unlike many builders who outsource key phases, we operate with a fully integrated structure:

Design Studio: – for creativity and concept development.

Engineering Department: for naval architecture and systems integration.

Shipyard Production: for fabrication, assembly, and finishing.

After-Sales Team: for lifelong support and upgrades.

This ensures uncompromised quality, shorter delivery times, and absolute confidentiality.

Transparency and Partnership

We believe that building a yacht should be as rewarding as owning one.

From contract signing to sea trials, we maintain clear communication, honest timelines, and total financial transparency. Our clients become lifelong partners — part of a family bound by a shared passion for excellence and the sea.

Shipbuilding Solutions

Crafting Marine Excellence - From Luxury to Offshore Performance

Our foundation and passion lie in building world-class vessels.

We design and construct a wide range of ships in our shipyard located in Rashid, EGYPT — from luxurious custom yachts to industrial-grade marine vessels serving commercial and offshore sectors.

Our shipbuilding solutions include:

Luxurious Yachts

Tailor-made motor and explorer yachts that embody innovation, artistry, and comfort.

Tug Boats

Designed for maximum pulling power, endurance, and maneuverability.

Anchor Handling Tug Supply (AHTS) Vessels

Multi-role offshore vessels for towing, anchor handling, and supply.

Crew & Supply Vessels

Fast, reliable transport for personnel, fuel, and cargo.

Barges & Workboats

Built for heavy-duty operations, logistics, and marine construction.

Utility Boats

Coastal and offshore operations boats.

Shipbuilding Engineering and Design

Welcome to the new standard in bespoke marine engineering.

At **Alex Whaler**, we don't just build boats — we bring visions to life through the science of Systems Engineering. Our process begins with a conversation. We take the time to truly understand your aspirations, requirements, and expectations on the water. From this dialogue, we develop a comprehensive blueprint — a precise and structured foundation that defines every aspect of your vessel.

From concept to completion, every weld, system, and component is meticulously engineered, tested, and validated against this master plan. This is not mere construction, it is precision craftsmanship guided by rigorous quality assurance and a commitment to excellence.

The result is a yacht that transcends expectations: engineered for superior safety, performance, and durability, and finished with the finest attention to detail. At **Alex Whaler**, your yacht isn't just built — it's perfected.

Our in-house Design and Naval Architecture Office is powered by advanced marine design technologies and a multidisciplinary team of naval architects, engineers, and marine designers.

Capabilities include:

- Hull form optimization and hydrodynamic analysis
- Structural and mechanical design
- Propulsion and stability calculations
- Interior and exterior 3D design visualization
- Systems integration and weight management
- Digital twin simulations for performance validation

Software used:

Rhinoceros 3D, Orca3D, Maxsurf, SolidWorks, AutoCAD, ShipConstructor, and Ansys.

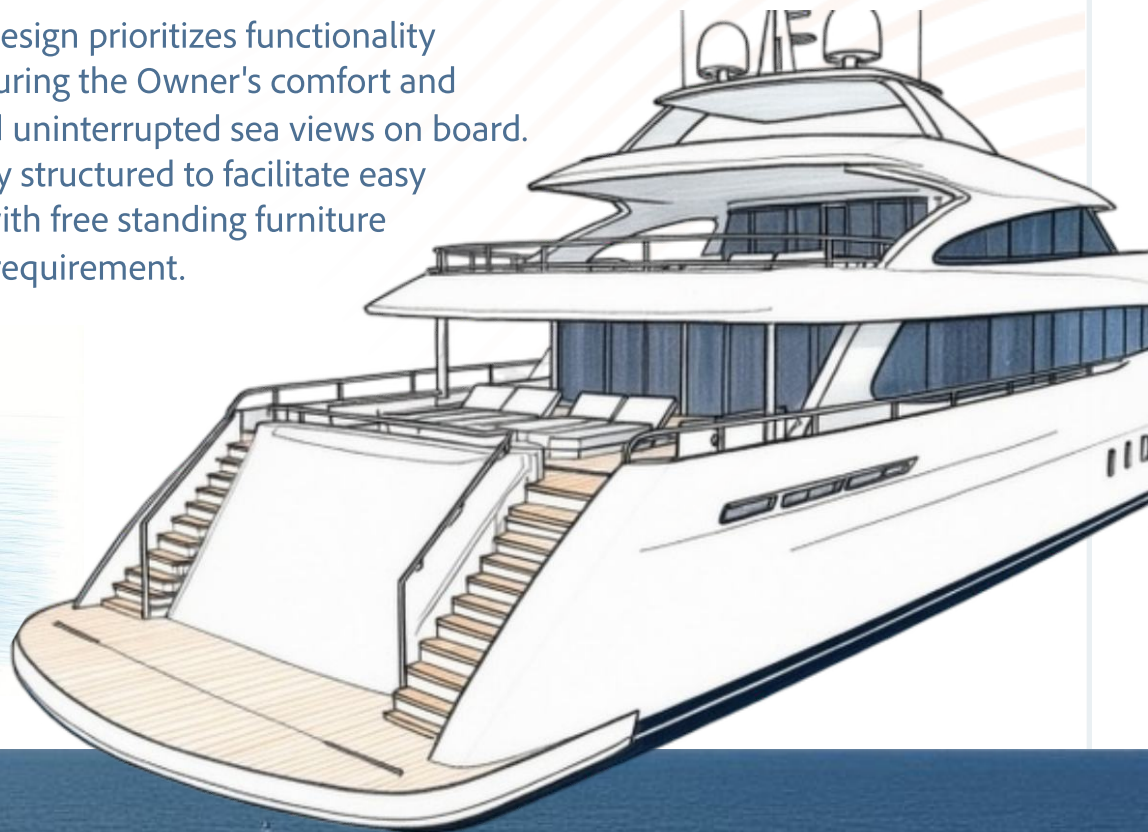

Luxurious Yachts

Sample of our in-house design office

35m Exterior

This yacht design is a steel and aluminum expedition, coupled with a sophisticated and contemporary interior. Designed in 2025, it offers sustained and comfortable cruising. This vessel is built on a robust displacement steel hull with aluminum superstructure and teak-laid-decks with an impressive volume of 299 Gross Tons.

This 35M yacht exterior design prioritizes functionality alongside aesthetics, ensuring the Owner's comfort and safety alongside light and uninterrupted sea views on board. The main deck is carefully structured to facilitate easy movement throughout with free standing furniture engineered to meet any requirement.

Luxurious Yachts

Sample of our in-house design office

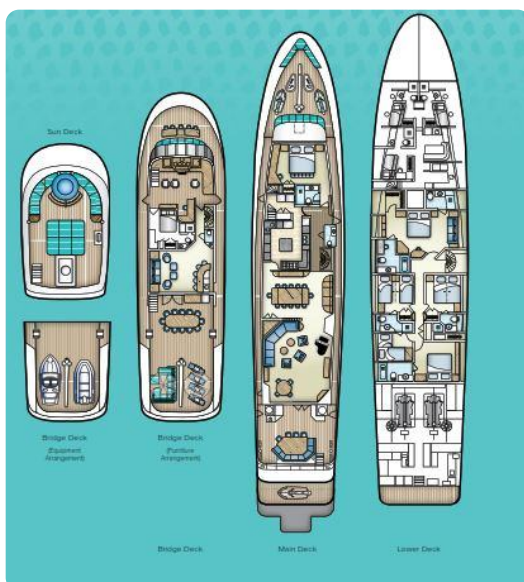

35m Interior

Moving towards the interior, the main saloon offers ample seating and a spacious dining area. Sliding doors ensure easy transition between indoor and outdoor spaces, while strategically positioned low bulwarks optimize panoramic sea views.

The Master suite, located forward on the main deck, uses materials such as Light Oak and White Lacquer, complemented by brushed steel details and accents of blue. The other 4 guest staterooms are on the lower deck, with design incorporating Dove Grey Leather headboards and Greige leather accents, ensure comfort and privacy, each featuring an en-suite bathroom. In total, this Exploration vessel comfortably accommodates 10 Guests in 5 en-suite staterooms, with 4 crew cabins for 6 crew members.

The wheelhouse, surrounded by expansive windows, is equipped with state-of-the-art navigation and communication systems to ensure optimal safety and precision navigation. In the galley, meticulous attention is paid to functionality and efficiency. Positioned away from guest areas, it features top-of-the-line equipment, enhancing convenience for onboard culinary operations.

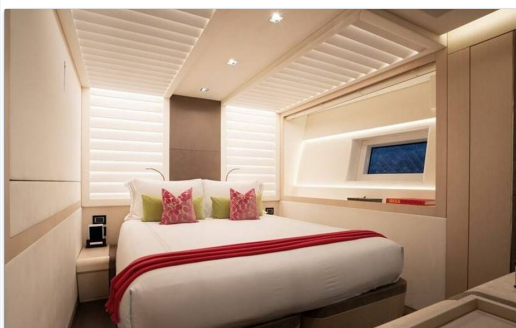

The upper deck and sundeck are engineered to provide ample space for guest entertainment and relaxation, equipped with amenities such as a large dining table, a lounge area, a fully equipped bar, and seating arrangements under sun awnings.

Information and Features

Propulsion System

Main Engine

Engine Type: Inboard
Fuel Type: Diesel
Type: Shaft Drive

Power: 2 x 175 hp
Propeller Type: 5 Bronze Blades
Propeller Material:

Auxiliary System

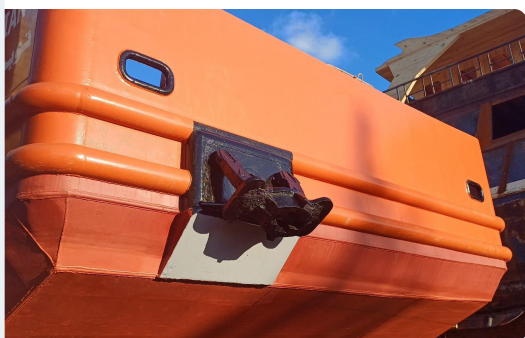

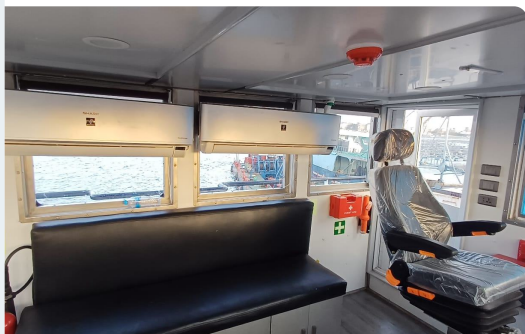

- 2 x 70 kW KOHLER, 1 x 35 kW KOHLER (night generator)
- Stabilizers: CMC LR090 electric fin stabilizer with underway and at anchor functions Bow Thruster: 75 kW CMC TP75 electric
- Stern Thruster: 37 kW CMC TP40EA electric Air Conditioning: CONDARIA 2 x 18
- BTU0,000 Fresh Air Make Up: GIANNESCHI GK 17 Water Makers: IDROMAR 8,600 l/day
- Water Softener Filter: IDROMAR Idrofast 9100 Hot Water Calorifiers: 2 x 150 Fuel Filters: ALFA LAVAL MIB-503 Fuel Transfer Pump: GIANNESCHI WC System: TECMA vacuum system
- Sewage System: HAMANN sewage treatment plant Grey/Black Water Discharge Pump: GIANNESCHI Lube Oil Transfer Pump: GIANNESCHI
- Hand Pump: GIANNESCHI

Intelligent, Custom-Built Split Hopper Barges for Precision Material Handling

Alex Whaler Shipbuilding Solutions revolutionizes split hopper barge design with smart, purpose-driven engineering that transforms dredging and bulk transport operations. Our custom-designed barges feature intelligent split mechanisms for rapid, spill-free discharge, precision-optimized hull structures to maximize cargo capacity and stability, and modular configurations tailored to your specific material type, route demands, and environmental requirements. Every vessel integrates future-ready innovations from automated load-balancing systems to reinforced wear zones for abrasive materials ensuring unmatched efficiency, safety, and longevity in the toughest conditions. Backed by our in-house design office, we deliver a complete turnkey solution, from concept to workshop-ready blueprints, engineered to adapt seamlessly to your operational goals. With Alex Whaler, your split hopper barge isn't just a workhorse it's a high-performance, customizable asset designed to elevate productivity, reduce downtime, and outperform industry standards.

MAIN DIMENSIONS	
LENGTH OVER ALL (HULL)	43.84 m
LENGTH WATERLINES (LBP)	36.10 m
BREADTH MOULDED	8.03 m
DEPTH MOULDED	2.81 m
DESIGN DRAUGHT	2.40 m APPROX.
LENGTH OF HOPPER	22.00 m
BREADTH OF HOPPER	6.00 m
HOPPER CAPACITY	336 M ³

Marine and Offshore Services

In addition to shipbuilding, we provide a comprehensive suite of marine and offshore services designed to meet the demands of today's energy, shipping and maritime sectors. Our offering spans from vessel construction and ship-management to offshore support, logistics and training. Every module of our service chain is tailored for safety, compliance, performance and cost-effectiveness.

Marine and Offshore Services

- Offshore vessel operation and maintenance
- Anchor handling, towing, and positioning support
- Crew transfer and offshore logistics
- Supply chain and provisioning services
- Marine equipment installation and inspection

Our team ensures that every vessel, whether built or managed by us, operates at peak performance in the most demanding conditions.

Marine and Offshore Services

continue

Ship Management & Crew Services

We offer integrated ship management solutions covering technical management, manning, maintenance, and operational oversight.

Our management capabilities include:

- Vessel registration and certification
- Planned maintenance systems (PMS)
- Crew recruitment, training, and certification
- ISM, ISPS, and MLC compliance
- 24/7 operations and performance monitoring

With our experienced marine professionals and certified seafarers, we guarantee safe, efficient, and compliant operations across all vessel types.

Marine and Offshore Services

continue

Brokerage, Trading & Chartering

Our brokerage division connects ship owners, operators, and investors with the right marine assets.

What We Offer:

- Newbuild and resale vessel brokerage
- Chartering and time charter management
- Equipment and spare parts sourcing
- Market intelligence and valuation consulting

Our global network ensures clients benefit from transparent, efficient, and profitable transactions.

Marine and Offshore Services

continue

Training, Certification & Consultancy

We believe that human expertise is as vital as engineering excellence. That's why we offer training and consultancy services to elevate industry standards.

Services include:

- Crew and technical staff training programs
- Safety, compliance, and environmental courses
- ISM, ISPS, and ISO system audits
- Technical advisory and feasibility studies
- Project management and commissioning support

Our consultants bring decades of experience in shipbuilding, offshore operations, and maritime management — ensuring every client operates with confidence and compliance.

Marine and Offshore Services

continue

Marine Supplies & Logistics

Through our chandlery and logistics operations, we supply vessels with essential materials, spare parts, and consumables on time and to specification.

Supply scope includes:

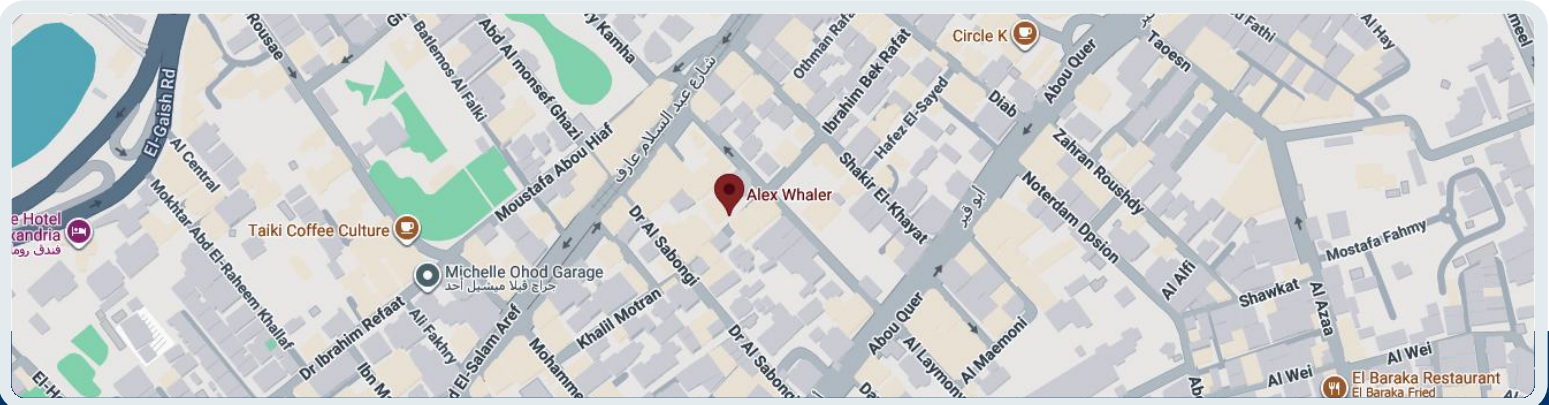

- Deck and engine stores
- Navigation and safety equipment
- Provisions and bonded stores
- Lubricants, ropes, and rigging supplies
- Bunkering and logistics coordination

We serve ports and offshore locations across continents, ensuring uninterrupted operations for our clients' fleets.
